Campbell did not offer to elaborate on this latter remark. Little However, he went on to state that Mc one's wife has been trying to get the two couples together again since their initial meeting. Campbell has told his wife to put off Mrs. McCone's overtures. Campbell said that he just does not want to get close to McCone in view of his (Campbell's) position, as he felt it might be quite awkward in the event his General Accounting Office ever had occasion to make inquiries into the operation of the Atomic Energy Commission.

Honorable Gordon Gray Special Assistant to the President Executive Office Building Washington, D. C.

My dear Mr. Gray:

In compliance with your request we have reinterviewed Mr. John A. McCone, Chairman, Atomic Energy Commission, in connection with the leak of National Security Council information which appeared in "The New York Times" on August 13, 1960.

During the interview Mr. McCone advised that at approximately 11:30 a.m. on August 12, 1960, he had briefed Atomic Energy Commissioners Mr. John S. Taham, Dr. Robert E. Wilson, and Mr. Loren K. Olson, regarding the matters discussed at the National Security Council meeting that day. These members of the Atomic Energy Commission were also interviewed.

The results of our interviews of Mr. McCona and the above-mentioned commissioners of the Atomic Energy Commission are set forth in the enclosed report. A copy of this report is also being furnished to the Attorney General.

For your confidential information, Mr. McCone gave every indication of being forthright and fully cooperative during the reinterview. Following the reinterview and as the agents were leaving his offices Mr. McCone in an obviously personal comment made in an offhand manner the statement that

personal opinion that the publication of this article actually did no harm. He did not elaborate on this but to commented that he wondered why there was so much pressure on the investigation. At this point he was again reminded that he had received a memorandum from Mr. Gordon Gray that the investigation was to be conducted by the FBI at the President's request. Mr. McCone stated he was aware of this and realized the Bureau's investigation was being conducted at the President's request but it was his personal opinion that maybe the agents' time could be better spent on other official matters. It was pointed out to him that the bureau was performing its responsibilities in other matters within its jurisdiction. He stated he understood the above situation.

In view of the obviously personal tenor of the above comments of Mr. McCone, they are not being sat forth in the enclosed report.

Sincerely yours,

The Washington Post, June 7, 1962, carried a short item indicating that Mrs. Paul Pigott, a prominent Seattle widow, was to wed Mr. McCone in Seattle next fall. You will recall that the Liaison Section recently reported that McCone was reported to be making a trip to the Far East and additionally, CIA was tightly holding information that McCone would be in Seattle on personal business. McCone is in Southeast Asia at the present time and he very likely could have traveled to Seattle, which trip may fit in with the news item.

CENTRAL INTELLIGENCE AGENCY (CIA)

A review of Bureau files indicates that Mrs. Pigott is the widow of Paul Pigott, former President of the Pacific Car and Foundry Company, Renton, Washington. This firm was founded by Pigott's father about 1900 and allegedly was affiliated with the Bethlehem Pacific Coast Steel Company.

In 1943 the Bureau conducted an investigation involving Pigott in an alleged fraud against the Government. This investigation stemmed from reported irregular transactions between the Pacific Car and Foundry Company and the U.S. Ordnance Department. The results of our investigation were submitted to the Department with the request that the Bureau be advised if any further investigation was desired. No further investigation was requested.

In 1953 we conducted an investigation of Pigott for the Atomic Energy Commission; this was done in connection with the processing of a security clearance for Pigott. The only derogatory information which was reported was that pertaining to the above-described alleged fraud against the Government. (62-60527-42031) and MCT-17SJP:ban

With regard to Mrs. Pigott, Bureau files indicate that she is 57 years of age. McCone is 60 years of age. In 1947 the Pigotts had three sons and two daughters. Mrs. Pigott's maiden name was Theiline McGee.

In 1944 one informant reported that the mailing list of the Joint Anti-Fascist Refugee Committee carried the name of Mrs. Paul Pigott. You will recall that this was a procommunist organization but mailing lists did include individuals who were not communists or procommunists.

SUBJECT.

PRESIDENT'S FOREIGN INTELLIGENCE ADVISORY BOARD

You previously have been advised that the captioned Board was reviewing the case of Sergeant Jack E. Dunlap, the National Security Agency (NSA) employee who operated as a Soviet Agent and who committed suicide in July, 1963. J. Patrick Coyne, Executive Secretary of the Board, brought up this case when he met with the Director on 10/29/63. On 2/11/64. Coyne confidentially advised Agent Papich that the Board had completed its report which includes a review of the case and its ramifications which affect the counterintelligence capabilities of U.S. agencies. Coyne stated that the Board's findings and recommendations were being submitted to the Attorney General, State Department, Secretary of Defense and the Director of Central Intelligence. is being asked for views and comments. Coyne pointed out that a special communication was being directed to each of the above agencies in order to circumvent any move on the part of John McCone to assume the responsibility of coordinating the comments and observations of other agencies and having him submit one representative reply to the Board. According to Coyne, McCone had informally suggested that the matter be handled with him as the coordinator. Coyne has vehemently opposed this.

Coyne assumes that the Attorney General will refer the report and recommendations to the Bureau since there are certain items of interest to us. In this connection he made the following information /available.

The Board recommends that steps be taken to assure that the FBI has adequate agent resources to effect "required domestic counterintelligence coverage of both Soviet-bloc and non-bloc official installations and personnel who may be engaged in intelligence or related activity." According to Coyne, the Board discussed problems encountered by the Bureau when much of its personnel is diverted to various problems and activities such as Civil Rights matters. The discussion included a statement, source not identified, that 200 additional Agents would be needed to handle domestic counterintelligence coverage. 1.3

Memo Mr. Brennan to Mr. Sullivan Re: PRESIDENT'S FOREIGN INTELLIGENCE ADVISORY BOARD

Another recommendation reads that the policies of the State Department with respect to authorizing technical coverage be re-examined with a view of liberalizing such policies to the extent needed to provide adequate coverage. This recommendation was centered around the discussion dealing with State Department's reported refusal of a Bureau request to install technical coverage of certain diplomatic installations, not identified.

In another recommendation, the Board requests that in the future when consideration is being given to "exchange of spies", State Department should make certain that there is advance consultation with the Bureau and CIA in order to assure that adequate attention is given to all intelligence aspects. This recommendation was predicated on the Board's discussion on the Egorov case. The Egorovs were "traded" with the Soviets without consultation with the Bureau.

The Board also recommends that consideration be given to the establishment of an "interdepartmental counterintelligence mechanism to assure promulgation of counterintelligence policy," to assure proper guidance, exchange of information and the overall coordination of efforts in the counterintelligence field. Such a mechanism would not involve operational matters. This recommendation allegedly was based on information coming to the attention of the Board indicating that some agencies do not have the benefit of knowledge and experience gained by other agencies in countering Soviet penetrations. The recommendation does not specify exactly how such a mechanism will be established and how it will be directed. The recommendation reads that "consideration be given."

Other recommendations mentioned in the report pertain to

(1) furnishing NSA complete responsibility for the security of its
personnel and those assigned to the agency; (2) providing additional
powers through legislation for the Director of NSA so that he can be
in a stronger position to dispose of undesirable personnel; (3) that
action be taken by Department of Defense (DOD) to assure clean-cut
delineation of investigative responsibilities of investigative units
within DOD; (4) the establishment of strict personnel security standards
for all sensitive agencies; (5) that DOD give consideration to reviewing its present program involving reorganization of personnel every
five years so that emphasis can immediately be placed on questionable
security cases and that action then be taken on other personnel "across
the board;" (6) that all sensitive agencies have adequate inspection
systems; (7) that studies concerning the use of the polygraph be expedited;
(8) that sensitive agencies have "counterintelligence oriented personnel"
to review security cases; (9) that all personnel be fully indoctrinated

ADVISORY BOARD

concerning security; (10) that personnel handling counterintelligence matters be fully briefed concerning "sophisticated and professional information" regarding abnormal sexual activity, perversion, etc.; (11) that any agency having the responsibility on a particular security case be promptly furnished information in the possession of other agencies; (12) that "the need to know" principle be rigorously applied by all agencies; (13) that more cover positions be afforded to CIA in Soviet-bloc countries; (14) that State not restrict clandestine intelligence operations by U. S. personnel until full consideration is given at the highest level in Government. (According to Coyne, this is based upon State's refusal to permit CIA to run certain operations in Moscow relating to our sensitive source TOPHAT); (15) prevent construction of Soviet Embassy in Washington, D. C., area until the U. S. Government is satisfied that we can proceed with the construction of comparable facilities in Moscow; (16) that reciprocal arrangements be made to correct the serious imbalance in numbers of U.S. personnel stationed in Soviet-bloc countries as compared with Soviet-bloc personnel stationed in the U.S.; (17) that the White House be promptly notified when an agency receives information concerning a serious penetration of a U.S. installation. (This apparently was pointed toward DOD not reporting certain information to the White House on a more expedite basis.)

ACTION:

For information. If approved, we will wait for the Attorney General to refer the Board's report to us so that we can have the benefit of full details and exact language for any action we may be obliged to take.
